TWELFTH REPORT

OF THE

BOARD OF SUPERINTENDENCE OF DUBLIN HOSPITALS.

TO HIS EXCELLENCY JOHN POYNTZ EARL SPENCER,
Lord Lieutenant-General and General Governor of Ireland.

35, Dawson-street, Dublin,
4th April, 1871.

MAY IT PLEASE YOUR EXCELLENCY,

We, the Board of Superintendence of Dublin Hospitals, have the honour to submit to Your Excellency this our Twelfth Annual Report, being for the year ended 31st March, 1869.

Since the date of our last Report we have inspected the several Institutions which receive grants from Parliament. These are:—

1. The Westmoreland Lock Hospital.
2. The House of Industry Hospitals, viz.:—
 - a. The Hardwicke Fever Hospital.
 - b. The Whitworth Medical Hospital.
 - c. The Richmond Surgical Hospital.
3. Steevens' Hospital.
4. The Meath Hospital and County Dublin Infirmary.
5. The Cork-street Fever Hospital.
6. The Rotunda Lying-in Hospital.
7. The Coombe Lying-in Hospital.
8. St. Mark's Ophthalmic Hospital; and
9. The Hospital for Incurables, which receives a portion of the Concordatum Fund.

On the occasion of those inspections we made inquiry respecting the state and condition of each hospital, to ascertain if the comforts of the patients were duly provided for, the buildings kept in sufficient repair, and the general management of each satisfactory. We have since issued the Circular (No. 1, Appendix) requesting such information or suggestions as the Governors might wish to offer in respect to its funds, management, &c., and we give their replies in the Appendix (No. 2).

*The West-
moreland
Lock
Hospital.*

THE WESTMORELAND LOCK HOSPITAL.

64 patients remained in the Lock Hospital on the 31st March, 1868; 777 were admitted; 762 were discharged; and 16 died in the year ended 31st March, 1869; and 64 remained at that period.

The hospital on inspection was in a satisfactory state as to cleanliness and ventilation, but there was an irregularity in the dietary causing increased expense, which, on being pointed out, has been corrected.

The average daily number of beds occupied throughout the year was 74½. The time spent by each patient in hospital averaged 35 days; 51 of the patients are stated to have returned to their friends; and 58 to have gone to penitentiaries.

The average cost of each patient in the year was £40 2s. 9d., which appears high. We drew attention to this at our visit.

*Steevens'
Hospital.*

STEEVENS' HOSPITAL.

162 patients remained in Steevens' Hospital on the 31st of March, 1868; 1,939 were admitted in the year ended March, 1869; 1,895 were discharged, 46 died, and 160 remained at that period.

The mortality was 2·37 per cent. The time spent in hospital by each patient averaged 27 days.

The daily average number of beds occupied throughout the year was 149.

The midwifery staff of this hospital attended 134 labour cases at the homes of the respective women in the year ended January, 1869. None died.

The hospital on inspection was in a satisfactory state.

*The Meath
Hospital.*

THE MEATH HOSPITAL.

103 patients remained in the Meath Hospital on 31st of March, 1868; 1,383 were admitted in the year ended March, 1869; 74 died in the year; and 93 remained at the end of it.

147 of the admissions were fever patients, of whom 13, or 9 per cent., died.

The mortality was 5·31 per cent. The time spent in hospital by each patient averaged 24 days.

The daily average number of beds occupied throughout the year was 98½.

The hospital on inspection was in a satisfactory state.

*The Cork-
street Fever
Hospital.*

THE CORK-STREET FEVER HOSPITAL.

82 patients remained in the Cork-street Fever Hospital on the 31st of March, 1868; 965 were admitted in the year ended 31st of March, 1869; 912 were discharged; 77 died; and 58 remained at the end of the year.

The mortality was 7·77 per cent. The time spent in hospital by each patient averaged 21 days.

The daily average number of beds occupied throughout the year was 60.

The hospital on inspection was in a satisfactory state.

THE HOUSE OF INDUSTRY HOSPITALS.

*The House
of Industry
Hospitals.*

The Hardwicke Fever Hospital.

52 patients remained in the Hardwicke Fever Hospital on the 31st of March, 1868; 856 were admitted, 776 were discharged, and 78 died in the year ended 31st of March, 1869; and 54 then remained.

The daily average number of beds occupied throughout the year was 46. The time spent in hospital by each patient averaged 18½ days.

The mortality was 9·16 per cent.

The Whitworth Medical Hospital.

61 patients remained in the Whitworth Medical Hospital on the 31st of March, 1868; 1,027 were admitted, 947 were discharged, and 78 died, in the year ended 31st of March, 1869; and 63 remained at that period.

The daily average number of beds occupied throughout the year was 57. The time spent in hospital by each patient averaged 20 days.

The mortality was 7·61 per cent.

The Richmond Surgical Hospital.

88 patients remained in the Richmond Surgical Hospital on the 31st of March, 1868; 1,112 were admitted, 1,138 were discharged, and 34 died, in the year ended 31st of March, 1869; and 98 then remained.

The average daily number of beds occupied throughout the year was 81½. 24½ days was the average period spent in hospital by each patient.

The mortality was 2·90 per cent.

The whole institution was in a satisfactory state when inspected.

THE ROTUNDA LYING-IN HOSPITAL.

*The
Rotunda
Lying-in
Hospital.*

25 patients remained in the labour-wards of the Rotunda Lying-in Hospital on the 31st of March, 1868; 1,134 were admitted, 1,106 were discharged, and 29 died, in the year ended 31st of March, 1869; and 19 remained at that period.

7 patients remained in the chronic wards of this hospital on the 31st of March, 1868; 158 were admitted, 154 were discharged, and 4 died, in the year ended 31st of March, 1869; and 7 then remained.

153 of the labour cases were discharged, not being then in labour. The number of deliveries in the year was 981. The mortality was 2·56 per cent. One in 34 of those that were delivered died.

The time spent in hospital by each labour case averaged 9½ days. The daily average number of beds occupied throughout the year was 41.

The time spent in hospital by the chronic patients averaged 17½ days. The mortality was 2·42 per cent.

141 extern labour cases were attended during the year, of whom one died of convulsions.

The hospital was clean, well ventilated, and in a satisfactory state when inspected.

*The
Coombe
Lying-in
Hospital.*

THE COOMBE LYING-IN HOSPITAL.

17 patients remained in the labour-wards of the Coombe Lying-in Hospital on the 31st of March, 1868; 486 were admitted, 492 were discharged, and 5 died, in the year ended 31st March, 1869; and 6 remained at that period.

9 patients remained in the wards for the treatment of female chronic diseases at the commencement of the year; 43 were admitted, 46 were discharged, and 6 remained, on the 31st March, 1869.

The time spent in hospital by the labour cases averaged 12 days; that by the chronic patients, 18 days.

The daily average number of beds occupied throughout the year by the labour cases was 17; by the chronic, 6.

41 were discharged from the labour wards not being then in labour; the deliveries were thus reduced to 451. The mortality was 1·9 per cent. One in 90 of the deliveries died.

The mortality of the labour patients was 1·28 per cent.

929 extern labour cases were attended in the year, of whom 5 died; 2 of convulsions, 2 of hæmorrhage, 2 of ruptured uterus, and 1 of peritonitis. One in 136 died.

The hospital was in a satisfactory state when inspected.

*The Hos-
pital for In-
curables.*

THE HOSPITAL FOR INCURABLES.

154 patients remained in the Hospital for Incurables on the 31st of March, 1868; 45 were admitted, 3 were discharged, and 44 died, in the year ended 31st of March, 1869; and 152 remained at that period.

The daily average number of beds occupied throughout the year was 155½. The time spent in hospital by each patient was 285 days.

The mortality was 93 per cent. on the number treated to a termination, but as few are discharged from such an institution, the mortality must always be very high.

The institution was in a satisfactory state when inspected.

ST. MARK'S HOSPITAL.

*St. Mark's
Hospital.*

26 patients remained in St. Mark's Hospital on the 31st of March, 1868; 263 were admitted, and 275 were discharged, in the year ended 31st March, 1869; and 14 then remained.

The daily average number of beds occupied throughout the year was 23. The time spent in hospital by each patient averaged 30½ days.

The hospital on inspection was in a satisfactory condition.

Classified lists of the patients treated in each hospital, and of the diseases of which patients died in each, during the year ended 31st of March, 1869, are given in the Appendix (No. 3).

We append Tables Nos. 3, 4, and 5, which show in detail the income and expenditure of each institution in the above year, the number of patients treated, the mortality in each hospital; the daily average number of beds occupied throughout the year; and the average annual cost per bed in each hospital.

APPENDIX.

APPENDIX No. 1.

35, Dawson-street, Dublin,
15th November, 1870.

SIR,—I am directed by the Board of Superintendence of Dublin Hospitals to request that the Governors of the () Hospital will supply them with any information or suggestions which they deem necessary to give respecting the state and condition of that Institution, preparatory to the Board's Annual Report to His Excellency the Lord Lieutenant.

I am, &c.,

DENIS PHELAN, *Secretary*.

The Registrar of the
——— Hospital.

APPENDIX No. 2.

Westmoreland Lock Hospital, Dublin,
7th December, 1870.

SIR,—In reply to your letter dated the 15th ult., I am desired by the Board of Governors of this Hospital to say that they have no information or suggestions to give respecting the state and condition of this Hospital; but they do not wish to let the opportunity pass without again urging upon the attention of the Board of Superintendence of Dublin Hospitals the pressing necessity that exists for an increased grant to this Hospital.

I am, sir, your obedient servant,

BENJAMIN F. M'DOWEL,

Senior Surgeon and Registrar.

To Denis Phelan, esq., M.D., &c., &c.

Doctor Stevens' Hospital, Dublin,
18th November, 1870.

SIR,—I am directed by the Governors of this Hospital to state, in reply to your circular of the 15th inst., that they have not, this year, any additional information respecting the state and condition of this Institution beyond that already conveyed to you in the various returns sent in to the Board of Superintendence of Dublin Hospitals.

I am, sir, your very obedient servant,

R. B. M'VITTIE.

Dr. Phelan,

Meath Hospital,
November, 1870.

SIR,—I am directed by the Governors of this Hospital to acknowledge the receipt of your letter of 15th inst., and to state that they have not any suggestions to make, the condition of the Institution being satisfactory, and the benefit it affords great, considering the very limited funds at their disposal.

I remain, sir, your obedient servant,

EDWARD B. STANLEY, *Secretary*.

D. Phelan, esq., Secretary,
Dublin Hospitals Board of Superintendence.

Fever Hospital and House of Recovery,
Cork-street, Dublin, December 3, 1870.

SIR,—The Managing Committee of this Institution, having had under their consideration your letter of the 15th ult., think the present a favourable opportunity for bringing more prominently to notice some points on which the Cork-street Fever Hospital and House of Recovery can rest superior claims for encouragement and support.

The present existing accommodation of the Hospital may be taken at beds for 100 acute cases, and the established staff is able, with very slight assistance, to attend to that number; but the average annual income of the Institution is not equivalent to the additional expense of maintenance for more than about seventy patients; any increase over that average must therefore be viewed with apprehension.

When, in March, 1865, the number of patients amounted to 174, the Governors still refused no fit case, and the result of treating such a very increased number of patients was a heavy debt, which partly by a special subscription list, partly by the saving effected by having been able to temporarily close one ward for a few months in 1869, in consequence of the diminished number of patients, and by the most careful economy, has been reduced to about £350. Under these circumstances the Committee think it right to call attention to the fact that the average number of patients during October, 1870, was over 76, and during November over 84, the types of disease being very severe, and necessitating considerable extra expense in nourishment and stimulants.

The extensive accommodation and suitable situation of this Hospital are not only to be appreciated for its capabilities of treating large numbers of patients in times of special sickness, but, also, from its arrangements, for its ability to isolate cases of small-pox, &c., where such a course is desirable.

In addition to the accommodation mentioned for acute cases, this Hospital has a most comfortable (detached) set of recovery wards, where convalescent patients can recover strength previous to discharge, and without the necessity of again entering the acute wards. This arrangement is presumed to be far superior to the more general practice of having "day-rooms" only for the accommodation of convalescents, who have, therefore, to continue to sleep in the acute wards.

The Managing Committee think that it should be generally known that no recommendation either of physician or subscriber is necessary for the admission of a patient. A fit case, presenting itself at any hour, is admitted; either the resident apothecary or one of the resident pupils being always in readiness to examine those presenting themselves.

Supplemental to this, the ordinary mode of admitting patients, the Committee point out, with much satisfaction, that they have provided, for many years past, a comfortable four-wheeled cab, specially fitted up for the removal of patients from their own homes. This boon to the sick poor has been largely made use of; the number of patients sent for during the five years ended 31st of March last, having amounted to 2,587, being on an average over 500 a year. In order, however, to obviate the possibility of unfit cases being thus introduced into the Hospital, a certificate of acute febrile disease of a medical type is required before sending the cab, and it may be mentioned that of those certificates about 80 per cent. are signed by the physicians of the Dublin Dispensaries, who thus show the high opinion they entertain of the value of this Institution.

There have been attached to this Hospital since its establishment a most efficient disinfecting apparatus, and a special laundry for the clean-

ing of the patients' private clothing, which they thus receive on discharge clean and pure; preventing the possibility of carrying to their homes the seeds of infection.

This Hospital, of course, presents a most valuable field for the study of fever and kindred diseases. Besides the advantages afforded to the resident pupils, the Committee's rules enable the physicians to give clinical instruction to their pupils during their daily visits.

I have the honour to be, sir, your obedient servant,

T. F. EUSTACE, *Registrar.*

D. Phelan, esq., M.D., &c., &c.,

Secretary to the Board of Superintendence of Dublin Hospitals.

House of Industry Hospitals, Dublin,
19th January, 1871.

SIR,—Referring to your circular of 15th November last, and to your communication of the 6th instant, informing the Board of Governors of the House of Industry Hospitals, in reply to their letter of the 18th of November—that the information is required for the Annual Report of the Board of Superintendence for the year ended March, 1869, I am directed by the Board of Governors to state that except to furnish you with a list of the number of extern patients treated at these hospitals—a return whereof is subjoined*—they have no information or suggestions to offer for insertion in the Report for the year in question, beyond what have been already supplied.

I am, sir, your obedient servant,

JAMES WILSON HUGHES, *Secretary.*

The Secretary,
Board of Superintendence of Dublin Hospitals,
35, Dawson-street.

The Lying-in Hospital, Dublin,
24th November, 1870.

SIR,—I am directed by the Governors of the Lying-in Hospital to acknowledge the receipt of your letter of the 15th instant, requesting that they will supply the Board of Superintendence of Dublin Hospitals with any information or suggestions respecting the state and condition of the institution, and in reply I am desired to inform you that the Hospital is at present in a most efficient and satisfactory condition, and that its character as a school of midwifery and for the diseases of females continues to be well maintained.

The Board of Superintendence will observe, from the returns furnished, that there is a considerable increase in the number of patients admitted to the wards for diseases of females, and also of those labour patients attended at their own homes.

The Governors have no suggestions to offer.

I am, sir, your obedient servant,

J. G. STRICKLAND, *Secretary.*

Denis Phelan, esq., Secretary,
&c., &c.

* A return of the number of extern patients prescribed for at the House of Industry Hospitals during the year ended 31st March, 1869:—

Medical cases,	2,551
Surgical cases,	6,708
Number of Trusses issued gratuitously to the ruptured poor,	446

Total extern cases, 9,705

Coombe Lying-in Hospital, Dublin,
21st January, 1871.

SIR,—I am directed to state to you, for the information of the Board of Superintendence of Dublin Hospitals, that the Guardians and Directors of the Coombe Lying-in Hospital have no special information or suggestions to convey respecting the condition and state of that Institution, beyond the fact that during the past year every department of the Hospital has continued to be worked with full efficiency, and to their entire satisfaction, with benefit to the objects of the charity; and that the restoration of the Guinness Dispensary Buildings in connexion with the Hospital is rapidly approaching completion.

I am, sir, your obedient servant,
JOSEPH MULLEN, *Assistant Secretary*.

Denis Phelan, esq.

Hospital for Incurables, Donnybrook-road,
9th December, 1870.

SIR,—I am directed by the Governors of this Hospital to acknowledge receipt of your letter of 15th November, requesting to be supplied with any information or suggestion which they may deem necessary to give, respecting the state and condition of the Institution, preparatory to the Board's Annual Report to His Excellency the Lord Lieutenant; and in reply thereto I am directed to inform you that this Board do not deem it necessary to offer any suggestion or to propose any alteration in the arrangements, its state and condition being maintained in the best order with strict regard to economy.

I have the honour to be, sir, your most obedient servant,
WM. A. GARRATT, *Secretary*.

To Denis Phelan, esq.,
Secretary, Board of Superintendence.

1, Merrion-square, North,
20th September.

DEAR DR. PHELAN,—You will be happy to hear that the Institution continues to progress, and now that we have excluded the indiscriminate admission of cases of workhouse infectious ophthalmia, St. Mark's usefulness as an operative and teaching establishment is rendered more effective.

I wish your Board would recommend the establishment of an hospital for the cure of ophthalmia and granular lids, not connected with so small an Institution as St. Mark's, where we find it impossible to keep the cases separate.

Yours, faithfully,
W. R. WILDE.
